I'm going to show you how to CRUSH financial markets using a simple Money Management System that reduces your risk while maximizing profits! While this system may focus on FOREX trading and the casino game Roulette, it can be applied to trading ANY financial market, including stocks, commodities, and binary options. I was inspired to develop this system after a horrible night in Las Vegas where I lost \$2000 playing Roulette with a betting system that I thought was unbeatable. I spent the following 12 years reverse engineering everything that went wrong that dreadful night and developed what I discovered into a simple and powerful Money Management system that makes it easy for anyone to CRUSH financial markets like a professional gambler! After developing this system, I returned to Las Vegas and turned \$20 into \$500 in about 1 hour at the roulette table, and that was down from a high of \$750. The \$500 profit that I walked away with was locked in from the profit-locking mechanism, like a gear that spins freely in one direction but quickly locks in the opposite direction. In January 2015, I had this system programmed into an MT4 Forex Trading Robot so I could automate the entire system (signals, trade execution, and money management). After a few weeks of little activity, the market sprang to life and so did my system! My account doubled in about 48 hours and that's when I knew I had developed something very special. But my trading robots are NOT required to use this system. It can be applied manually to virtually ANY trading system in ANY market and even on casino games like Roulette, although you will get much better results in financial markets where you can have far better statistics than a casino game. So come join me and I'll open a whole new dimension of trading and opportunities for BIG PROFITS that you have never noticed before!

Distills complex theories for the benefit of the average trader with little or no background in finance or mathematics by offering a wide range of valuable, practical strategies for limiting risk, avoiding catastrophic losses and managing the futures portfolio to maximize profits. Numerous topics are explored including: why most traders lose at the futures game most of the time; why most mechanical trading systems are apt to fail; the probabilistic approach to trading; how to make stop-loss orders work for, rather than against you; the pros and cons of options versus futures trading; and how to limit risk through diversification.

Clear, concise, and practical, The Trading Game shows you how to harness the power of money management for any trading method "The goal of most futures traders is to make a million dollars as fast and as painlessly as possible. Unfortunately, few traders achieve this goal. In The Trading Game, Ryan Jones demonstrates how the proper application of his new money management strategy, Fixed Ratio Trading, can enable an average trading system to earn spectacular profits. My advice? Don't trade until you've spent as much time and effort on money management as you've spent on developing your entry and exit rules."
