Absolution Gap: Overlong, tedious and frustrating conclusion Originally posted at Fantasy Literature
Absolution Gap (2003) is the third book in Alastair Reynolds’ REVELATION SPACE series of large-canvas hard SF in which post-human factions battle each other and implacable machines bent on exterminating sentient life. The series has elements of Bruce Sterling’s Schismatrix, Frank Herbert ...

Absolution Gap - Review I really expected to like this book, but as it turns out, this book crawls at a slow pace, to many plots and characters. With this many characters, John Lee has problem with the voice of each, John Lee is the one the saves this novel. I'm a hardcore SiFi fan and I just could not listen to it more than a hour at a time, I would just drift off, especially during the very ...

Absolution Gap is not without its faults, chief among them the sudden hurtle to the end in the last few chapters, which seems rather abrupt after five hundred pages of leisurely, atmospheric prose. Overall, though, an excellent final volume in the story of the Inhibitors. Reynolds has clearly hit his stride now, and it'll be interesting to see where he goes from here. Review by John Toon ...

Absolution Gap
Absolution Gap is a science fiction novel by Welsh author Alastair Reynolds. It takes place in the Revelation Space universe and is a direct sequel to Redemption Ark. Plot summary. The plot of the novel takes place in four separate time periods. The bulk of the novel is contained in the 2675 and 2727 sections. ...

In the epic conclusion of the Revelation Space trilogy, veteran Clavain and his desperate companions seek refuge on a remote moon, light-years away from the ancient killing machines wreaking havoc on the universe in an attempt to destroy all human life, only to discover that to defeat this horrific enemy, they must forge an uneasy alliance with an even more deadly "ally." Reprint.

In the third book of the legendary Revelation Space trilogy, the last remnants of humanity realize that forging an alliance with a greater and even more mysterious alien force may be their only chance for survival. The Inhibitors were designed to eliminate any life form reaching a certain level of intelligence -- and they've targeted Humanity. War veteran Clavain and a ragtag group of refugees have fled into hiding. Their leadership is faltering, and their situation is growing more desperate. But their little colony has just received an unexpected visitor: an avenging angel with the power to lead mankind to safety -- or draw down its darkest enemy. And as she leads them to an apparently insignificant moon light-years away, it begins to dawn on Clavain and his companions that to beat one enemy, it may be necessary to forge an alliance with something much worse . . . "Absolution Gap is a good as it gets, and should solidify Alastair Reynolds' reputation as one of the best hard SF writers in the field." -- SF Site

"Revelation Space" and "Redemption Ark" have been hailed as "the best of the new breed of space opera." Now "Absolution Gap" concludes Reynolds' epic science fiction trilogy.

Elysium Fire is a smoldering tale of murderers, secret cultists, tampered memories, and unthinkable power, of bottomless corruption and overpowering idealism from the king of modern space opera. Ten thousand city-state habitats orbit the planet Yellowstone, forming a near-perfect democratic human paradise. But even utopia needs a police force. For the citizens of the Glitter Band that organization is Panoply, and the prefects are its operatives. Prefect Tom Dreyfus has a new emergency on his hands. Across the habitats and their hundred million citizens, people are dying suddenly and randomly, victims of a bizarre and unprecedented malfunction of their neural implants. And these "melters" leave no clues behind as to the cause of their deaths... As panic rises in the populace, a charismatic figure is sowing insurrection, convincing a small but growing number of habitats to break away from the Glitter Band and form their own independent colonies. For more from Alastair Reynolds, check out: Revenger

Alastair Reynolds pushes the boundaries of science fiction and “confirms his place among the leaders of the hard-science space-opera renaissance” (Publishers Weekly) in this novel in his Revelation Space universe. Late in the twenty-sixth century, the human race has advanced enough to accidentally trigger the Inhibitors–alien killing machines designed to detect intelligent life and destroy it. The only hope for humanity lies in the recovery of a secret cache of doomsday weapons–and a renegade named Clavain who is determined to find them. But other factions want the weapons for their own purposes–and the weapons themselves have another agenda altogether...

Return to the dazzling world of Revelation Space with this British Science Fiction Award-winning space opera about a young man hell-bent on revenge on the surface of a twisted, disease-corrupted planet. The once-utopian Chasm City -- a domed human settlement on an otherwise inhospitable planet -- has been overrun by

a virus known as the Melding Plague, capable of infecting any body, organic or computerized. Now, with the entire city corrupted -- from the people to the very buildings they inhabit -- only the most wretched sort of existence remains. For security operative Tanner Mirabel, it is the landscape of nightmares through which he searches for a lowlife postmortal killer. But the stakes are raised when his search brings him face to face with a centuries-old atrocity that history would rather forget. One of Locus and Science Fiction Chronicle's "Best SF Novels of the Year"

A collection of eight short stories and novellas in the dark and turbulent world of Alastair Reynolds' Revelation Space universe. Centuries from now, solidarity stretches thin as humanity spreads past the solar system and to the nearest stars. Technology has produced powerful new tools-but lethal risk will always accompany great advancement. And without foresight, opposing groups may fracture multiple worlds. Between the Demarchists and the Conjoiners, the basic right to expand human intelligence-beyond its natural limits-has become a war-worthy cause. Only vast lighthugger starships bind these squabbling colonies together, manned by the panicky and paranoid Ultras. And the hyperpigs just try to keep their heads down. The rich get richer. And everyone tries not to think about the worrying number of extinct alien civilizations turning up on the outer reaches of settled space...because who's to say that humanity won't be next?

Part science fiction thriller, part interstellar adventure, and part noir crime, Century Rain is an astonishing international bestseller of "blistering powers and style" (SF Revu). Three hundred years from now, Earth has been rendered uninhabitable due to the technological catastrophe known as the Nanocaust. Archaeologist Verity Auger specializes in the exploration of its surviving landscape. Now, her expertise is required for a far greater purpose. Something astonishing has been discovered at the far end of a wormhole: a mid-20th-century version of Earth, preserved like a fly in amber. Somewhere on this alternate planet is a device capable of destroying both worlds at either end of the wormhole. And Verity must find the device, and the man who plans to activate it, before it's too late -- for the past and the future of two worlds. Century Rain is a jaw-droppingly good SF thriller, packed with pace, adventure, brilliant storytelling and with twists that will keep you guessing to the end.

Pushing Ice is the brilliant tale of extraordinary aliens, glittering technologies, and sweeping space opera from award-winning science fiction author Alastair Reynolds. 2057. Humanity has raised exploiting the solar system to an art form. Bella Lind and the crew of her nuclear-powered ship, the Rockhopper, push ice. They mine comets. And they're good at it. The Rockhopper is nearing the end of its current mission cycle, and everyone is desperate for some much-needed R & R, when startling news arrives from Saturn: Janus, one of Saturn's ice moons, has inexplicably left its natural orbit and is now heading out of the solar system at high speed. As layers of camouflage fall away, it becomes clear that Janus was never a moon in the first place. It's some kind of machine -- and it is now headed toward a fuzzily glimpsed artifact 260 light-years away. The Rockhopper is the only ship anywhere near Janus, and Bella Lind is ordered to shadow it for the few vital days before it falls forever out of reach. In accepting this mission, she sets her ship and her crew on a collision course with destiny -- for Janus has more surprises in store, and not all of them are welcome.
