the systems used to construct new buildings or restore older ones. These systems include the building structure itself, the lighting, sound, and electrical systems, and the ...

What is Architectural Engineering? (with pictures)

Architectural engineering, also known as building engineering or architecture engineering, is an engineering discipline that deals with the technological aspects and multi-disciplinary approach to planning, design, construction and operation of buildings, such as analysis and integrated design of environmental systems, structural systems, behavior and properties of building components and materials, and construction management. From reduction of greenhouse gas emissions to the construction of re

Architectural engineering - Wikipedia

The way buyers find, vet and select architecture, engineering and construction firms is changing. And this is putting firms that rely on traditional marketing at a disadvantage. At the same time, the marketplace is evolving — from the economy to new competitors to the political landscape.
