Basic Statistics for Business & Economics, Second Canadian Edition provides Canadian business students (majoring in economics, finance, marketing, accounting, management and other fields of business administration) with an introductory survey of the many business applications of descriptive and inferential statistics. Maintaining a student-oriented learning environment, examples and problems are designed to teach the basics while remaining relevant to the real world -- of key importance to helping students understand the relevance of statistics. Building upon the strenth of the first edition, the author has taken great strides to expand the Canadian sources for data sets, references and examples.

BASIC STATISTICS FOR BUSINESS AND ECONOMICS, 4/e contains comprehensive coverage of statistical tools and methods delivered in a student friendly, step-by-step format. The text is non-threatening and presents concepts clearly and succinctly with a conversational writing style. All statistical concepts are illustrated with solved applied examples immediately upon introduction. Modern computing tools and applications are introduced, but the text maintains a focus on presenting statistics content as oppose to technology or programming methods, this edition continues as a 'students' text with increased emphasis on interpretation of data and results. This essentials version of the more comprehensive text includes 13 chapters (versus 20 chapters in the longer 11/e), in a two-color format, with some condensed coverage and all optional topics or chapters eliminated. It contains the core topics covered in most Business Statistics courses in fewer pages.
