Chapter 29-Reflection
and Refraction

Flashcards | Quizlet

Reflection is a wave bouncing off of a surface, while a refraction is a wave going through a medium. When a wave crosses a surface at an angle from one medium

Online Library

Chapter 29

into another, why does it "pivot" as it moves across the boundary into the new medium?

Questions

Chapter 29 Reflection And Refraction

Answers

Reflection and Refraction. Chapter 29 Reflection Reflection some or all of a wave bounces back into the first medium when

Online Library

Chapter 29

hitting a boundary of a second medium. When all the wave energy is reflected back instead of being transmitted, it is total reflection. If some energy is transmitted and some is reflected, the wave is partially reflected.
