Snapping objects
There is a known bug
(think it was
discussed some
weeks ago) where if a
group is selected,
only the topmost
object in the group
snaps to the
guidelines. If the

Download Free Corel Draw

same objects are selected but not grouped however, only the object at the bottom of the stack snaps to the guidelines. Maybe this is what you are seeing? 0 Tracey over 1 year ago

with grouped objects.

I also observe that this is not working correctly. timd1971 10 months ago in reply to Garold +2

Not working: grouped objects snap to guidelines -

CorelDRAW ...

Snapping objects.

When you move or draw an object, you

Download Free Corel Draw

can snap it to another object in a drawing.

You can snap an object to a number of snap points in the target object. When the pointer is close to a snap point, the snap point is highlighted, indicating it as the pointer's snapping target. To snap an object to another object with greater

Download Free Corel Draw

precision, you first snap the pointer to a snap point in the object, and then snap the object to a snap point in the target object.

Unfortunately the
"snap-to-itself"
function can not be
turned off in Draw, I
think it should be.

Anyway, two simple
ways to get around it:
1. Temporarily disable
guideline snapping,
just as Myron and
Eskimo said. You can
