The Before Columbus Foundation 2018 Winner of the AMERICAN BOOK AWARD Tommy J. Curry's provocative book The Man-Not is a justification for Black Male Studies. He posits that we should conceptualize the Black male as a victim, oppressed by his sex. The Man-Not, therefore, is a corrective of sorts, offering a concept of Black males that could challenge the existing accounts of Black men and boys desiring the power of white men who oppress them that has been proliferated throughout academic research across disciplines. Curry argues that Black men struggle with death and suicide, as well as abuse and rape, and their gendered existence deserves study and theorization. This book offers intellectual, historical, sociological, and psychological evidence that the analysis of patriarchy offered by mainstream feminism (including Black feminism) does not yet fully understand the role that homoeroticism, sexual violence, and vulnerability play in the deaths and lives of Black males. Curry challenges how we think of and perceive the conditions that actually affect all Black males.

Demonstrates the extent to which Josiah Royce's ideas about race were motivated explicitly in terms of imperial conquest. Another white Man's Burden performs a case study of Josiah Royce's philosophy of racial difference. In an effort to lay bare the ethnological racial heritage of American philosophy, Tommy J. Curry challenges the common notion that the cultural racism of the twentieth century was more progressive and less racist than the biological determinism of the 1800s. Like many white thinkers of his time, Royce believed in the superiority of the white races. Unlike today however, whiteness did not represent only one racial designation but many. Contrary to the view of the British-born Germanophile philosopher Houston S. Chamberlain, for example, who insisted upon the superiority of the Teutonic races, Royce believed it was the Anglo-Saxon lineage that possessed the key to Western civilization. It was the birthright of white America, he believed, to join the imperial ventures of Britain—to take up the white man's burden. To this end he advocated the domestic colonization of Blacks in the American South, suggested that America's xenophobia was natural and necessary to protecting the culture of white

America, and demanded the assimilation and elimination of cultural difference for the stability of America's communities. Another white Man's Burden reminds philosophers that racism has been part of the building blocks of American thought for centuries, and that this must be recognized and addressed in order for its proclamations of democracy, community, and social problems to have real meaning. "Curry has paid attention to the odd and icky bits of Royce, tracking down the offhand cultural references, the unfamiliar names, and historical contexts. A solid analysis of early twentieth-century conceptions of race and colonialism reveals an unseemly picture before our contemporary eyes. Curry is right; we shouldn't ignore or soft-pedal this." — Lee A. McBride III, the College of Wooster

With a full introduction and textual commentary, this volume introduces William H. Ferris's *The African Abroad*, a treatise on racial idealism, Black ethnology, and the evolution of Blacks from Negro to Negrosaxon, presenting the first evidence of a Black American idealist and evolutionary thinker in philosophy.

The Movement for Black Lives (M4BL) has gained worldwide visibility as a grassroots social justice movement distinguished by a decentralized, non-hierarchical mode of organization, and in 2020 Black Lives Matter protests across the country shook America's moral conscience to its core. M4BL rose to prominence in part thanks to its protests against police brutality and misconduct directed at Black Americans. However, its animating concerns are far broader, calling for a wide range of economic, political, legal, and cultural measures to address what it terms a "war against Black people," as well as the "shared struggle with all oppressed people." Yet despite the significance of the social, political, and economic goals of M4BL, as well as the innovative organizational leadership strategies it employs, M4BL has so far received little sustained philosophical attention. *The Movement for Black Lives: Philosophical Perspectives* brings philosophical analysis to bear on the aims, strategies, policy positions, and intellectual-historical context of M4BL. Leading scholars tackle such themes as: "Black Lives Matter" as a political speech act, M4BL's conception of the value of Black lives, the gender dynamics of the Movement, the relation of M4BL to other Black liberation movements and transitional justice movements, the Movement's new forms of leadership and organization, and the impact of racism on the normative assessment of the criminal justice system. The volume broaches a wide range of pressing issues in the philosophy of language, social and political philosophy, philosophy of race, philosophy of gender, and the philosophy of punishment. It is vital reading for students and scholars in the humanities and social sciences interested in race, inequality, and social justice movements.

This collection invites us to think about how African-descended men are seen as both appealing and appalling, and exposed to eroticized hatred and violence and how some resist, accommodate, and capitalize on their eroticization. Drawing on James Baldwin and Frantz Fanon, the contributors examine the contradictions, paradoxes, and politico-psychosexual implications of Black men as objects of sexual desire, fear, and loathing. Kitossa and the contributing authors use Baldwin's and Fanon's cultural and psychoanalytic interpretations of Black masculinities to demonstrate their neglected contributions to thinking about and beyond colonialist and Western gender and masculinity studies. This innovative and sophisticated work will be of interest to scholars and students of cultural and media studies, gender and masculinities studies, sociology, political science, history, and critical race and racialization. Contributors: Katerina Deliovsky, Delroy Hall, Dennis O. Howard, Elishma Khokhar, Tamari Kitossa, Kemar McIntosh, Leroy F. Moore Jr., Watufani M. Poe, Satwinder Rehal, John G. Russell, Mohan Siddi

Nannie Helen Burroughs (1879–1961) is just one of the many African American intellectuals whose work has been long excluded from the literary canon. In her time, Burroughs was a celebrated African American (or, in her era, a "race woman") female activist, educator, and intellectual. This book represents a landmark contribution to the African American intellectual historical project by allowing readers to experience Burroughs in her own words. This anthology of her works written between 1900 and 1959 encapsulates Burroughs' work as a theologian, philosopher, activist, educator, intellectual, and evangelist, as well as the myriad of ways that her career resisted definition. Burroughs rubbed elbows with such African American historical icons as W. E. B. DuBois, Booker T. Washington, Anna Julia Cooper, Mary Church Terrell, and Mary McLeod Bethune, and these interactions represent much of the existing, easily available literature on Burroughs' life. This book aims to spark a conversation surrounding Burroughs' life and work by making available her own tracts on God, sin, the intersections of church and society, black womanhood, education, and social justice. Moreover, the volume is an important piece of the growing movement toward excavating African American intellectual and philosophical thought and reformulating the literary canon to bring a diverse array of voices to the table.

This volume focuses on two questions: why do people from one social group oppress and discriminate against people from other groups? and why is this oppression so mind numbingly difficult to eliminate? The answers to these questions are framed using the conceptual framework of social dominance theory. Social dominance theory argues that the major forms of intergroup conflict, such as racism, classism and patriarchy, are all basically derived from the basic human predisposition to form and maintain hierarchical and group-based systems of social organization. In essence, social dominance theory presumes that, beneath major and sometimes profound difference between different human societies, there is also a basic grammar of social power shared by all societies in common. We use social dominance theory in an attempt to identify the elements of this grammar and to understand how these elements interact and reinforce each other to produce and maintain group-based social hierarchy.

*Philosophy and Hip-Hop: Ruminations on Postmodern Cultural Form* opens up the philosophical life force that informs the construction of Hip-hop by turning the gaze of the philosopher upon those blind spots that exist within existing scholarship. Traditional Departments of Philosophy will find this book a solid companion in Contemporary Philosophy or Aesthetic Theory. Inside these pages is a project that parallels the themes of existential angst, corporate elitism, social consciousness, male privilege and masculinity. This book illustrates the abundance of philosophical meaning in the textual and graphic elements of Hip-hop, and thus places Hip-hop within the philosophical canon.

*Critical Race Theory in the Academy* explores the deep implications of race and its effects on the expanse of the American social fabric and its fragile democratic process. This volume contributes to a more effective, powerful, and insightful theorization of racism across the social spectrum while furthering the movement for greater equity in higher education and beyond. The audience for this book is broad and should be of great interest and value to all Americans who fight against racism which is focused on the destruction of Black people and other people of color. Ideally, educators, scholars, and practitioners will be compelled to engage the ideas within this volume to break down the color line and challenge the problematic master narrative in education and other aspects of society. *Critical Race Theory in the Academy* offers current applications, debates, theories, strategies, and evolutions about critical race theory (CRT), with particular attention to CRT's intersections with the field of higher education and beyond. As a part of the CRT corpus, this volume details some of the most relevant and current topics deployed in varied disciplines of the academy, confronting the complex interplay of race, racism,

education, and social justice in the twenty-first century. Specifically, the authors explore topics from health disparities, politics, religion, literature, music, social work, psychology, sports, distance learning, media bias, affirmative action, to education policies, practices and scholarship. The chapters in this volume should help navigate the tensions in the academy and beyond to work toward alleviating institutionalized racism. Praise for *Critical Race Theory in the Academy*: "The field of Critical Race Theory is enriched by this important collection of new and original scholarship. Vernon Farmer has brought together a dynamic and eclectic mix of radical voices, from multiple disciplinary backgrounds, including both established and early career scholars. The result is a volume that constantly challenges and surprises the reader." David Gillborn Professor of Critical Race Studies University of Birmingham UK Founding Editor of *Race Ethnicity & Education* "Critical Race Theory in the Academy has excavated the terrain of critical race theory to unearth multiple perspectives that are central to defining the fundamental contours of the field. Each essay enhances the ways in which we read and understand the complexity of critical race theory. It will be an invaluable resource for building a critical academy." Aileen Moreton-Robinson Queens and University of Technology, Australia Author of *The White Possessive: Property, Power and Indigenous Sovereignty* "Vernon Lee Farmer has done it again and for the final time. He has pulled together a star-studded cast of academics of color to address an essential concern of the academy. Throughout his career, Farmer has demonstrated the uncanny ability to identify matters that require attention, and attacked them with vigor. In doing so, he provided us with high impact resources that are beneficial to the professional trajectory of scholars of color. This book is no different, and we all should race to the bookstore to add this instant classic to our personal library." Jerlando F. L. Jackson Vilas Distinguished Professor of Higher Education University of Wisconsin-Madison Former Editor, *ASHE Reader Series on Higher Education* "Critical Race Theory in the Academy adds substantially to our understanding of the roles that race, racism, and social justice play as we tackle the myriad problems of pre-K through higher education. For those interested in gaining a deeper understanding of the issues in higher education -- from curriculum to the lack of diversity in the professoriate -- this work provides helpful insights that can enrich conversations and problem-solving across sectors of society." Freeman A. Hrabowski, III President University of Maryland Baltimore County, Baltimore, Maryland
