This public domain book is an open and compatible implementation of the Uniform System of Citation.

Design and manufacturing is the essential element in any product development lifecycle. Industry vendors and users have been seeking a common language to be used for the entire product development lifecycle that can describe design, manufacturing and other data pertaining to the product. Many solutions were proposed, the most successful being the Stadndard for Exchange of Product model (STEP). STEP provides a mechanism that is capable of describing product data, independent from any particular system. The nature of this description makes it suitable not only for neutral file exchange, but also as a basis for implementing, sharing and archiving product databases. ISO 10303-AP203 is the first and perhaps the most successful AP developed to exchange design data between different CAD systems. Going from geometric data (as in AP203) to features (as in AP224) represents an important step towards having the right type of data in a STEP-based CAD/CAM system. Of particular significance is the publication of STEP-NC, as an extension of STEP to NC, utilising feature-based concepts for CNC machining purposes. The aim of this book is to provide a snapshot of the recent research outcomes and implementation cases in the field of design and manufacturing where STEP is used as the primary data representation protocol. The 20 chapters are contributed by authors from most of the top research teams in the world. These research teams are based in national research institutes, industries as well as universities.

The complex and dynamic interlinks between natural resource management (NRM) and development have long been recognized by national and international research and development organizations and have generated voluminous literature. However, much of what is available in the form of university course books, practical learning manuals and reference materials in NRM is based on experiences from outside Africa. Managing Natural Resources for Development in Africa: A Resource Book provides an understanding of the various levels at which NRM issues occur and are being addressed scientifically, economically, socially and politically. The book's nine chapters present state-of-the-art perspectives within a holistic African context. The book systematically navigates the tricky landscape of integrated NRM, with special reference to Eastern and Southern Africa, against the backdrop of prevailing local, national, regional and global social, economic and environmental challenges. The authors' wide experience, the rich references made to emerging challenges and opportunities, and the presentation of different tools, principles, approaches, case studies and processes make the book a rich and valuable one-stop resource for postgraduate students, researchers, policymakers and NRM practitioners. The book is designed to help the reader grasp in-depth NRM perspectives and presents innovative guidance for research design and problem solving, including review questions, learning activities and recommended further reading. The book was developed through a writeshop process by a multi-disciplinary team of lecturers from the University of Nairobi, Egerton University, Kenyatta University, the University of Zimbabwe, the University of Malawi, Makerere University and the University of Dar es Salam. In addition, selected NRM experts from regional and international research organizations including the World Agroforestry Center (ICRAF), the Africa Forest Forum, RUFORUM, IIRR and the International Development Research Centre (IDRC) participated in the writeshop and contributed material to the book.

This guidance provides practical advice on the recording, analysis and understanding of earthworks and other historic landscape features using non-intrusive archaeological field survey and investigation techniques. It describes and illustrates approaches to archaeological field survey, drawing conventions and Levels of Survey for record creators and users. The guidance also draws from the experience of Historic England field teams, exploring different aspects of landscape investigation and analysis through a series of case studies. This revised version of the 2007 edition is one of several pieces of Historic England guidance available from the Historic England website. This guidance builds on those documents and stands alongside Understanding Historic Buildings: a guide to good recording practice.

Today's workplace is a dynamic, ever-changing environment. Job security is a thing of the past, layoffs are common, and people change jobs and careers frequently. Students need to be prepared to adapt to the unexpected twists and turns they may face. CREATING CAREER SUCCESS helps students develop a self-directed, proactive, flexible plan to launch and manage their careers over the years to come, using the latest technological resources and job search strategies. Through a process of self-assessment, career exploration, and self-promotion students discover how to connect their skills, interests and values to a variety of possible careers, build relationships, and present themselves in the best possible light to potential employers. Most importantly, students are encouraged to keep their minds and options open, and to engage themselves fully in the career development process. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Published in 1839 and edited by abolitionist Theodore Dwight Weld, this work presents hundreds of primary-source accounts of the reality of slavery in the American South.The book's first section collects vivid first-person accounts by former slaves of their lives in slavery. In the second part, Weld offers page after page of stark quotations some as short as a single sentence from various Southern periodicals that illustrate in graphic detail the bondage, floggings, maimings and other horrors endured by slaves. Weld also presents and dissects various pro-slavery arguments. Distributed by the American Anti-Slavery Society, American Slavery As It Is was second only to Uncle Tom's Cabin for its impact on the anti-slavery movement in the United States.
