Information Age. Technology has become an integral part of our lives, and it has a profound influence over a large population. It may affect negatively to a considerable number of individuals in a particular society as a whole. Ethical issues, on the other hand, are problems that have been caused by individuals themselves and these have a negative influence over the individual him/herself as well as over the society. However, social and ethical issues should be eliminated for a smooth functioning of the social structure.

~~Legal, Ethical and Social Issues on Information Systems~~

Ethics is based on a person's own good personal values and society's customs. It relies on a person own internal initiative based on one's education, upbringing, culture and value judgment to act and behave in an ethical way. People are awarded with high self-satisfaction for doing ethical things. This is the basic motivation.

computers, its aim is to provide a guide to the issues suitable for undergraduates. In doing so, the author prompts the students to consider questions such as: "What are the moral codes of cyberspace?" Throughout, the book shows how in many ways the technological development is outpacing the ability of our legal systems to keep up, and how different paradigms applied to ethical questions may often offer conflicting conclusions. As a result students will find this to be a thought-provoking and valuable survey.

The frequency of new editions of this book is indicative of the rapid and tremendous changes in the fields of computer and

Information sciences. First published in 1995, the book has rapidly gone through three editions already and now we are in the fourth. Over this period, we have become more dependent on computer and telecommunication technology than ever before and computer technology has become ubiquitous. Since I started writing on social computing, I have been predicting a time when we, as individuals and as nations, will become totally dependent on computing technology. That time is almost on us. Evidence of this is embodied in the rapid convergence of telecommunication, broadcasting, and computing devices; the miniaturization of these devices; and the ever increasing storage

capacity, speed of computation, and ease of use. These qualities have been a big pulling force sucking in millions of new users every day, sometimes even those unwilling. Other appealing features of these devices are the increasing number of applications, apps, as they are increasingly becoming known, and being wireless and easily portable. Whether small or big, these new gizmos have become the c- terpiece of an individual's social and economic activities and the main access point for all information. Individuals aside, computing technology has also become the engine that drives the nations' strategic and security infrastructures that control power grids, gas and oil storage
