A dilated eye exam is the best thing you can do for your eye health! It's the only way to check for eye diseases early on, when they're easier to treat – and before they cause vision loss. The exam is simple and painless. Your eye doctor will check for vision problems that make it hard to see clearly, like being nearsighted or farsighted.

Get a Dilated Eye Exam | National Eye Institute

Eye screening is a way of spotting eye problems before you notice any changes to your sight. Everyone living with diabetes over the age of 12 will get an invite to a regular eye screening. Eye problems are very rare in children younger than 12 years old, so that's why they don't automatically get this check.

Diabetic eye screening | Diabetes UK

Optometric Clinical Practice Guidelines are recommendations for patient care which are developed through a formal process. They combine the best available current scientific evidence and research with expert clinical opinion to recommend appropriate steps in the diagnosis, management, and treatment of patients with various eye and vision conditions.
