Garmin Forerunner 645 Music From \$220, was \$450 As its name implies, the Garmin Forerunner 645 is the perfect smartwatch for runners. Running-centric features include ground contact time balance,...

The Women's Guide to Triathlon presents female-specific training, techniques, and equipment for triathlon. Guided by the USAT Women's Committee, whose goal is to encourage women's participation in the sport, 20 of the sport's top female coaches and athletes offer their winning advice.

From its first edition the purpose of Walford has been to identify and evaluate the widest possible range of reference materials. No rigid definition of reference is applied. In addition to the expected bibliographies, indexes, dictionaries, encyclopaedias, and directories, a number of important textbooks and manuals of general practice are included. While the majority of the items are books, Walford is a guide to reference material. Thus periodical articles, microforms, online and CD-ROM sources are all represented. In this volume a particular effort has been made to improve coverage of the latter two categories.

Provides a current and comprehensive review of the literature on imagery in psychology, and traces the evolution of the topic from ancient to modern times.

The SAGE Guide to Educational Leadership and Management allows readers to gain knowledge of educational management in practice while providing insights into challenges facing educational leaders and the strategies, skills, and techniques needed to enhance administrative performance. This Guide emphasizes the important skills that effective leaders must develop and refine, including communication, developing teams, coaching and motivating, and managing time and priorities. While being brief, simply written, and a highly practical overview for individuals who are new to this field, this reference Guide will combine practice and research, indicate current issues and directions, and choices that need to be made. Key features include: 30 brief, signed chapters are organized in 10 thematic parts in one volume available in a choice of electronic or print formats designed to enable quick access to basic information. Selective boxes enrich and support the narrative chapters with case examples of effective leadership in action. Chapters conclude with bibliographic endnotes and references to further readings to guide students to more in-depth presentations in other published sources. Back matter includes an annotated listing of organizations, associations, and journals focused on educational leadership and administration and a detailed index. This reference Guide will serve as a vital source of knowledge to any students pursuing an education degree as well as for individuals interested in the subject matter that do not have a strong foundation of the topic.

In the European Union (EU) and its Member States, as elsewhere, the marketing of pharmaceuticals has become subject to an increasingly complex web of legislation and regulation, resulting from the intense scrutiny necessary to ensure such essential products are not only efficacious but safe. This useful volume lays out this system with extraordinary clarity and logic. Adopting a Europe-wide perspective on the law governing pharmaceuticals, expert authors from the law firm Bird & Bird LLP map the life cycle of a medicinal product or medical device from development to clinical trials to product launch and ongoing pharmacovigilance, offering comprehensive and unambiguous guidance at every stage. A brief overview of how the proposed exit from the EU by the UK will affect the regulatory regime is also included. Following an introductory overview focusing on the regulatory framework for pharmaceuticals in Europe from its underlying rationales to the relevant committees and agencies each of fifteen incisive chapters examines a particular process or subject. Among the many topics and issues covered are the following: - obtaining a marketing authorisation; - stages and standards for creating a product dossier; - clinical trials; - how and when an abridged procedure can be used; - criteria for conditional marketing authorisations; - generic products and essential similarity; - paediatric use and the requisite additional trials; - biologicals and biosimilars; - homeopathic and herbal medicines; - reporting procedures; - pharmacovigilance; - parallel trade; - relevant competition law and intellectual property rights; and - advertising. In addition, national variation charts in many of the chapters illustrate eight major jurisdictions (Belgium, France, Germany, Italy, The Netherlands, Spain, Sweden, and the UK). Sample forms and URLs for the most important Directives are included. Pharmaceutical lawyers and regulatory advisers, both in-house and in private practice, will welcome this unique book. It offers immeasurable value for all who need to understand the process of bringing a medicinal product or medical device to market and the continuing rights and obligations.

A good general cruising guide covering the routes from Europe to Australia and points in between. The 'Indian Ocean Cruising Guide' covers all the usual points of interest for cruising yachtsmen, from history to climate, weather patterns, formalities, route planning and so on. The general sections are followed by a country-by-country round-up in which key ports are described in detail with the aid of harbour plans and photographs. This second edition (2007) has been thoroughly revised and contains a lot of additional information on Malaysia and Thailand, the Seychelles and the Chagos archipelago. The introduction has been expanded and throughout there are new plans and photographs. This guide is an ideal companion to Rod Heikell and Andy O'Grady's 'Ocean Passages and Landfalls' which discusses routes across the Indian Ocean.

Provides descriptions, prices, and photographs of small firearms.

Antipsychotic drugs have revolutionised the management of major psychiatric disorders and the outcomes of those who suffer from them. They are, however, possessed of a range of adverse effects, amongst the most frequent and distressing of which are those resulting in disturbance of voluntary motor function. Extrapyramidal side effects - or E.P.S. - are still poorly recognised and not infrequently misattributed. Despite a vast research literature, there have been few attempts to bring together both the descriptive clinical elements of these disorders and major research conclusions pertinent to routine practice. This very readable and well illustrated 1999 book seeks to rectify this in the hope of increasing clinicians' awareness of the issues and acknowledgement of their impact. This is a task made more rather than less urgent with the emergence of drugs of lower liability but which may promote subtler abnormality than standard compounds.
