Aqua Rite has stopped generating  
chlorine. A flashing LED indicates a  
15-60 second time delay period.

CHECK SALT When flashing, the salt  
level is low (below 2700 ppm) and  
Aqua Rite is generating at low  
efficiency. When illuminated steady,  
the salt level is too low and Aqua Rite  
has shut down. Page 10 4. Push the  
Diagnostic button to exit.

## ~~Aqua Rite & Aqua Rite XL Diagnostics Manual~~

The Aqua Rite Goldline Salt Generator is an automatic sanitation unit used in pools and spas. The unit works by converting salt into free chlorine, which helps to kill any bacteria or algae that forms in the pool or spa's water supply. Once the bacteria or algae has been eliminated, the chlorine then changes back into salt.

level in the pool water—will need to be at the correct level. For these systems, it should ideally be between 3200-3600 ppm (parts per million). This can be tested using a salt test meter or salt test strips.

### ~~How to Calibrate a Hayward Goldline Aqua-Rite or Swim Pure ...~~

Unlike traditional chlorine treatments that require a regular routine of monitoring and replacing chlorine, electronic chlorination produces chlorine from common table salt. The key is the patented Turbo Cell®, a specially designed converter connected to the control unit.
