George and Annie are off on another cosmic adventure inspired by the Mars Expedition in the fifth book of the George ' s Secret Key series from Stephen and Lucy Hawking. George and his best friend, Annie, have been selected as junior astronauts for a program that trains young people for a future trip to Mars. This is everything they ' ve ever wanted—and now they get to be a part of up-to-the minute space discoveries and meet a bunch of new friends who are as fascinated by the universe as they are. But when they arrive at space camp, George and Annie quickly learn that strange things are happening—on Earth as well as up in the skies. Mysterious space missions are happening in secret, and the astronaut training they ' re undertaking gets scarier and scarier...

George travels to the future in the epic conclusion of the George 's Secret Key series from Lucy Hawking. When George finds a way to escape the spacecraft Artemis, where he has been trapped, he is overjoyed. But something is wrong. There 's a barren wasteland where his hometown used to be, intelligent robots roam the streets, and no one will talk to George about the Earth that he used to know. With the help of an unexpected new friend, can George find out what—or who—is behind this terrible new world, before it 's too late?

Fun science meets humor and heart in this adventure about a boy who is searching for his mother . . . in a parallel universe. Stephen Albie Bright leads a happy, normal life. Well, as normal as it gets with two astrophysicist parents who named their son after their favorite scientists, Stephen Hawking and Albert Einstein. But then Albie 's mother dies of cancer, and his world is shattered. When his father explains that she might be alive in a parallel universe, Albie knows he has to find her. So, armed with a box, a laptop, and a banana, Albie sets out to do just that. Of course, when you 're universe-hopping for the very first time, it 's difficult to find the one you want. As Albie searches, he discovers some pretty big surprises about himself and our universe(s), and stumbles upon the answers to life 's most challenging questions. A poignant, funny, and heartwarming adventure, this extraordinary novel is for anyone who has ever been curious. Praise for *The Many Worlds of Albie Bright*: “ A big book with a big brain, big laughs, and a big, big heart. ” —FRANK COTTRELL BOYCE, *New York Times* bestselling author of *Millions* and *Cosmic* “ Hilarious and full of heart. ” —PIERS TORDAY, author of *The Last Wild* “ I 'd love this book in all the worlds. Heartbreaking, heartwarming, heartstopping. Amazing. ” —HOLLY SMALE, author of the award-winning *Geek Girl* series “ Heartwarming. ” —*The Guardian* “ Proves the theory that novels about science can be enormous fun. ” —*The Times Children 's Book of the Week* (UK) “ Moving, and exploding with scientific ideas and wonder. ” —*The Herald* (UK)

L'Artista Roberto Bombassei ha intervistato Albert Einstein e Stephen Hawking. I due fisici più importanti del XX ° secolo ci portano a scoprire le meraviglie dell' universo. Per chi ama capire e sognare.

A unique insight into the mind of one of the world's most extraordinary thinkers. Undoubtedly the most famous scientist on the planet and the very face of physics over the last half-century, Stephen Hawking is remarkable for many reasons. Not least because he has continued to strive to achieve so much while being hamstrung by debilitating illness. He has demonstrated categorically that if you put your mind to it, you can achieve anything, no matter your physical state. Of course, it helps if you happen to possess a mind such as his. His work on black holes put him on the map, and he became globally famous for his *A Brief History of Time*, communicating the most difficult scientific ideas at a period when he'd lost the ability to speak. *How to Think Like Stephen Hawking* reveals the key motivations, desires and philosophies that make Hawking one of the world's most enduring talents. Studying how he overcame great adversity, fought his demons as well as his detractors and looked back to the origins of the universe, with quotes and passages by and about him, you too can learn to think like the man who claims he can think in eleven dimensions.

George and Annie are off on another cosmic adventure to figure out why strange things are happening on Earth in the fourth book of the George 's Secret Key series from Stephen and Lucy Hawking. George and his best friend Annie haven 't had any space adventures for a while and they 're missing the excitement. But not for long, because seriously strange things have started happening. Banks are handing out free money, supermarkets aren 't able to charge for their products so people are getting free food, and aircrafts are refusing to fly. It looks like the world 's biggest and best computers have all been hacked. And no one knows why... It 's up to George and Annie to travel further into space than ever before in order to find out what—or who—is behind it.
