Man Diesel Engine Trouble Shooting - installatienetwerk.nl

Most of the potential problems in a modern common rail diesel system engine can be explained by a drop in fuel pressure or engine compression, insufficient fuel supply, or fuel contamination. The major culprits are likely to be the fuel injectors, high pressure pump, fuel filter, fuel pressure sensor or regulator, glowplugs, or crankshaft sensor.

Diesel Engine Faulty? Problems and Solutions - Turbo Diesel UK

The MAN Energy Solutions two-stroke portfolio delivers the highest performance and efficiency across all engine types. MAN B&W two-stroke engines from the 30 to 95 cm bore sizes have a total power range from 3,200 kW to 82,440 measured at L1.

Two-stroke | MAN Energy Solutions

The coil jumper lead will have to be removed to turn off the engine if it starts. Make sure you have water hooked up to a flushett to the drive in case it starts. We use a jumper wire to jump a positive to the starter solenoid terminal (small yellow with red stripe) to get the engine cranking. Hopefully one of these items will reveal the problem.
