"From Red Earth" was hard to put down, but hard to read too. Denise Uwimana's transparency concerning her own spiritual journey is what sets this narrative apart from other accounts of the Rwandan Genocide. In this day of increasing tribalism throughout the Western nations and in the U.S. particularly, this book is a "must-read."

The Salt Path also serves as a reminder that Britain is a land criss-crossed by footpaths and that we take this 140,000-mile national glory for granted at our peril . . . The Salt Path has reminded me to scrape last year's mud from my walking boots and get rambling again. I hope it has the same impact on millions of others.

The late Jack Olsen had a long career of sustained excellence, but it was not until he was well into his eight and final decade that he emerged with his masterpiece in "Salt Of The Earth" — a rich character study and profound exploration of loss wrapped up seamlessly in a first-rate crime story rendered in exquisite and tender prose.

Salt of the Earth is a fast-paced fiction, and it is surprisingly easy to connect with Jess and Matteo. Jessila Prentiss, a brilliant chemical engineer and student, is on the run from agencies which may or may not be the government or terrorists. Matteo Wu, a stranger to Jess, helps her escape from these radicals.

The classic pacifist novel by a major Polish writer, who was nominated for the Nobel Prize At the beginning of the twentieth century the villagers of the Carpathian mountains lead a simple life, much as they have always done. Among them is Piotr, a bandy-legged peasant, who wants nothing more from life than an official railway cap, a cottage, and a bride with a dowry. But then the First World War reaches the mountains and Piotr is drafted into the army. All the weight of imperial authority is used to mould him into an unthinking fighting machine, forced to fight a war he does not understand, for interests other than his own. The Salt of the Earth is a classic war novel and a powerfully pacifist tale about the consequences of war for ordinary men.

"In the late summer of 1990 I fell into depression. By the time the Gulf War broke out, in the winter of 1991, I was well on my way to a breakdown. By the summer, with the help of my buddy Ed Orr, I was in a therapy program at the Vets Center in uptown Seattle." Red Eagle's extraordinary book deals directly with Native American experience of the Vietnam war and offers a healing and redemptive force in the face of violence and its aftermath.

Native American men and women who wound up in Vietnam were very different from traditional warriors. Many had been removed from that traditional culture as many of these warrior traditions had been removed from these new societies and the old traditions had been replaced by Christian practices of various types. The sacred preparations were no longer practiced and the warriors left vulnerable and lacking pertinent knowledge. They were also lacking the homecoming ceremonies. These ceremonies would take place after the warrior was kept from the main camp for four days. In those four days they would fast and purify themselves. Once they returned to the village the warrior was given the opportunity to tell his story in a healing ceremony. His immediate family would be near, or surrounding him. Around them would be the next level of family. Around them would be the remainder of the tribe. Everyone would listen, and remember. That was their duty to him, to listen, and to remember. Each warrior was given this opportunity. After this ceremony it was understood that this person was now different and would be treated so from then on. This "different" person was now accepted as having been permanently changed. What had happened to him would never go away. His people knew this and they would never go away either. The relationship was understood and bound. The Vietnam "warriors" were

afforded none of these opportunities. They were essentially on their own. For example, when I returned, my unit landed at McChord Air Force Base near Tacoma, Washington at midnight in the winter of 1972, and released for leave; Sprung upon The World. My sister picked me up at the base and we went to downtown Tacoma and had a pizza and a several beers before going to her home. A cousin-by-marriage, whom I had met and served with In-country, was with us. We stayed with my sister for a few days and eventually I went home to Sitka to complete my 45 days leave. My cousin left for his home in Canada at the same time. This story is repeated over and over again by most everyone that I had a chance to talk, or listen to. In many of these cases, the Vietnam Vet was released and sent home to resentment and hostility. He was not listened to and what ever was expressed was not heard. Many went home on drinking binges that started on the plane or as soon as they were off the plane. No comfort given, not a friendly ear was to be found. At most American Legion Posts beer was free for a while, but after it was determined "these new guys" were really different, the free drinks stopped. What little comfort was given was soon withdrawn. Soon, the prisons began to fill up with the "new guys". Violence had become the major expression of this generation of warriors. So many of these new guys were dead, or in prison, not long after their arrival "home". It was, and still is, a national tragedy.

Describes the devastating impact on Elaine and Joe Gere of the disappearance of their twelve-year-old daughter Brenda, the battle of one determined California woman to uncover the truth about a crime that led, six years later, to the prosecution of Michael Kay Green for the child's murder. Reissue.

Consisting of a series of case studies, this book is devoted to the concept and uses of salt in early modern science, which have played a crucial role in the evolution of matter theory from Aristotelian concepts of the elements to Newtonian chymistry. No reliable study on this subject has been previously available. Its exploration of natural history's and medicine's intersection with chemical investigation in early modern England demonstrates the growing importance of the senses and experience as causes of intellectual change from 1650-1750. It demonstrates that an understanding of the changing definitions of "salt" is also crucial to a historical comprehension of the transition between alchemy and chemistry.

The ancient counties surrounding the Weald in the SE corner of England have a strongly marked character of their own that has survived remarkably well in the face of ever-increasing population pressure. The area is, however, comparatively neglected in discussion of Roman Britain, where it is often subsumed into a generalised treatment of the 'civilian' part of Britannia that is based largely on other parts of the country. This book aims to redress the balance. The focus is particularly on Kent, Surrey and Sussex account is taken of information from neighbouring counties, particularly when the difficult subsoils affect the availability of evidence. An overview of the environment and a consideration of themes relevant to the South-East as a whole accompany 14 papers covering the topics of rural settlement in each county, crops, querns and millstones, animal exploitation, salt production, leatherworking, the working of bone and similar materials, the production of iron and iron objects, non-ferrous metalworking, pottery production and the supply of tile to Roman London. Agriculture and industry provides an up-to-date assessment of our knowledge of the southern hinterland of Roman London and an area that was particularly open to influences from the Continent.
