PHP is a scripted programming language that can be used to create websites. Short for "PHP: Hypertext Preprocessor" (the initials actually come from the earliest version of the program, which was called "Personal Home Page" but in their current form, constitute a recursive acronym), it is an open-source, reflective programming language used mainly for developing server-side applications and ...

Manual labour laying the floor, movement of tables and equipment & stage. Cost of the heaters, gas to heat them. It all needs paying for. It's likely there's more cost to transform the fanzone than the stadium company have for the South Stand bar. There's where your extra 20p/50p a pint goes to. And another thing to moan about thrown in? Bargain! Frank Zappa wrote: Some scientists claim that ...
