Our Documentation | Python.org

PEP 257 -- Docstring Conventions Abstract. This PEP documents the semantics and conventions associated with Python docstrings. Rationale. The aim of this PEP is to standardize the high-level structure of docstrings: what they should contain, and... Specification. What is a Docstring? A docstring is ...

PEP 257 -- Docstring Conventions | Python.org

7. Documenting Python¶ The Python language has a substantial body of documentation, much of it contributed by various authors. The markup used for the Python documentation is reStructuredText, developed by the docutils project, amended by custom directives and using a toolset named Sphinx to post-process the HTML output.

7. Documenting Python - Python Developer's Guide

shelve - Python object persistence. marshal - Internal Python object serialization. dbm - Interfaces to Unix "databases". sqlite3 - DB-API 2.0 interface for SQLite databases. Data Compression and Archiving. zlib - Compression compatible with gzip. gzip - Support for gzip files. bz2 - Support for bzip2 compression.

The Python Standard Library - Python 3.9.0 documentation

This reference manual describes the syntax and "core semantics" of the language. It is terse, but attempts to be exact and complete. The semantics of non-essential built-in object types and of the built-in functions and modules are described in The Python Standard Library. For an informal introduction to the language, see The Python Tutorial.

The Python Language Reference - Python 3.9.0 documentation

The Python standard library is conservative and requires limiting lines to 79 characters (and docstrings/comments to 72). The preferred way of wrapping long lines is by using Python's implied line continuation inside parentheses, brackets and braces. Long lines can be broken over multiple lines by wrapping expressions in parentheses.

PEP 8 -- Style Guide for Python Code | Python.org

Python 3.9.0 documentation. Welcome! This is the documentation for Python 3.9.0. Parts of the documentation: What's new in Python 3.9? or all "What's new" documents since 2.0. Tutorial start here. Library Reference keep this under your pillow. Language Reference describes syntax and language elements.

Python 3.9.0 documentation

By combining together these and similar commands, intricate shapes and pictures can easily be drawn. The turtle module is an extended reimplementaion of the same-named module from the Python standard distribution up to version Python 2.5.. It tries to keep the merits of the old turtle module and to be (nearly) 100% compatible with it.

turtle - Turtle graphics - Python 3.9.0 documentation

vformat (format\_string, args, kwargs) ¶. This function does the actual work of formatting. It is exposed as a separate function for cases where you want to pass in a predefined dictionary of arguments, rather than unpacking and repacking the dictionary as individual arguments using the \*args and \*\*kwargs syntax. vformat() does the work of breaking up the format string into character data and ...

string - Common string operations - Python 3.9.0 documentation

Python Documentation according to Best Practices Every programming language supports documentation. Furthermore, every programming language has its own best practices when it comes to documentation. Python makes no exception, and we have some rules to follow when writing python documentation.

The best practices in writing Python Documentation

For a description of standard objects and modules, see The Python Standard Library. The Python Language Reference gives a more formal definition of the language. To write extensions in C or C++, read Extending and Embedding the Python Interpreter and Python/C API Reference Manual. There are also several books covering Python in depth.

The Python Tutorial - Python 3.9.0 documentation

The Python Standard Library ¶ While The Python Language Reference describes the exact syntax and semantics of the Python language, this library reference manual describes the standard library that is distributed with Python. It also describes some of the optional components that are commonly included in Python distributions.

The Python Standard Library - Python 3.6.3 documentation

In the Python source each API function has the same two arguments (context and data\_dict), but the docstrings should document the keys that the functions read from data\_dict and not context and data\_dict themselves, as this is what the user has to POST in the JSON dict when calling the API.

Python coding standards - CKAN 2.9.1 documentation

The Hitchhiker's Guide to Python! - "A best-practice handbook to the installation, configuration, and usage of Python". Online open source package library for Python.
